BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors.
Follow this format for each person. **DO NOT EXCEED FIVE PAGES.**

NAME: **Last, First**

eRA COMMONS USER NAME (credential, e.g., agency login):

POSITION TITLE: **Title**

EDUCATION/TRAINING *(Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable. Add/delete rows as necessary.)*

INSTITUTION AND LOCATION	DEGREE *(if applicable)*	Completion Date MM/YYYY	FIELD OF STUDY
		mm/yyyy	
		mm/yyyy	
		mm/yyyy	
		mm/yyyy	
		mm/yyyy	

A. Personal Statement

During the transition to the new Biosketch format, NIH will not withdraw applications that include the previous Biosketch format. Beginning with applications submitted on or after January 25, 2022, failure to follow the appropriate Biosketch format may cause NIH to withdraw your application from consideration.

Full NIH Biographical Sketch instructions are here: https://grants.nih.gov/grants/how-to-apply-application-guide/forms-f/general/g.240-r&r-seniorkey-person-profile-(expanded)-form.htm#Instructions. Samples are here: https://grants.nih.gov/grants/forms/biosketch.htm. Figures, tables (other than those included in the provided format pages), or graphics are not allowed in the biosketch. Do not embed or attach files (e.g. video, graphics, sound, data). The biosketch may not exceed five pages per person. This five-page limit includes the table at the top of the first page.

If you are planning an NIH application due on or after January 25, 2022, take note that all senior/key personnel must have an eRA Commons ID, which is already a submission requirement for program directors/principal investigators and primary mentors listed on individual mentored career development applications. While all other senior/key personnel have been encouraged to obtain eRA Commons IDs, it has not yet been required. This extended requirement will facilitate data collection for individuals contributing to federally funded research, help NIH identify peer review conflicts of interest, and disambiguate application data.

For the Personal Statement, briefly describe why you are well-suited for your role(s) in this project. Relevant factors may include: aspects of your training; your previous experimental work on this specific topic or related topics; your technical expertise; your collaborators or scientific environment; and/or your past performance in this or related fields, including ongoing and completed research projects from the past three years that you want to draw attention to (previously known as research support).

You may cite up to four publications or research products that highlight your experience and qualifications for this project. Research products can include, but are not limited to, audio or video products; conference proceedings such as meeting abstracts, posters, or other presentations; patents; data and research materials; databases; educational aids or curricula; instruments or equipment; models; protocols; and software or netware. You are allowed to cite interim research products. Note: interim research products have specific citation requirements. See related Frequently Asked Questions for more information.

B. Positions, Scientific Appointments, and Honors

Positions

yyyy-yyyy	List in reverse chronological order all positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or governments.
yyyy-yyyy	This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary). High school students and undergraduates may include any previous positions.
yyyy-yyyy	For individuals who are not currently located at the applicant organization, include the expected position at the applicant organization and the expected start date.
yyyy-yyyy	Clinicians should include information on any clinical licensures and specialty board certifications that they have achieved.
yyyy-present	

Scientific Appointments

C. Contributions to Science

1. **Subheading.** Briefly describe up to five of your most significant contributions to science. The description of each contribution should be no longer than one half page, including citations. While all applicants may describe up to five contributions, graduate students and postdoctorates may wish to consider highlighting two or three they consider most significant.

    a.

    b.

    c.

    d.

2. **Subheading.** For each contribution, indicate the following: the historical background that frames the scientific problem; the central finding(s); the influence of the finding(s) on the progress of science or the application of those finding(s) to health or technology; and your specific role in the described work.

    a.

    b.

    c.

    d.

3. **Subheading.** For each contribution, you may cite up to four publications or research products that are relevant to the contribution. If you are not the author of the product, indicate what your role or contribution was. Note that while you may mention manuscripts that have not yet been accepted for publication as part of your contribution, you may cite only published papers to support each contribution. Research products can include audio or video products (see the [NIH Grants Policy Statement, Section 2.3.7.7: Post-Submission Grant Application Materials](#)); conference proceedings such as meeting abstracts, posters, or other presentations; patents; data and research materials; databases; educational aids or curricula; instruments or equipment; models; protocols; and software or netware. You are allowed to cite interim research products. Note: interim research products have specific citation requirements. See related [Frequently Asked Questions](#) for more information. Descriptions of contributions may include a mention of research products under development, such as manuscripts that have not yet been accepted for publication. These contributions do not have to be related to the project proposed in this application.
