Asthma Management for Students at School

Kim Cobb, M.A., RRT-NPS, AE-C
Arkansas Children's Asthma Program Coordinator

Course Activity Overview:

After completion of 10 self-paced modules through Turning Point, learners will increase their knowledge about new asthma guidelines/protocols to manage asthma in school aged children and increase their confidence level in their ability to implement a student's asthma action.

Topics include:

- Comprehensive review of asthma
- Current inhaled medications for treatment and delivery devices.
- Inhaler technique review
- 2020 updates to the asthma management guidelines including SMART therapy
- Emergency use of albuterol in the school setting
- Trigger avoidance strategies
- Utilization of the written asthma action plan
